International application No. PCT/IT02/00821

Item V:

- 1.1 Document D1 (EP-A-0 873 271) discloses the preamble of claim 1.

The subject-matter of claim 1 differs from D1 in further comprising:

a number of modules having no powered belt, and aligned to define a work line;
a push module having a powered belt and located at a first end of the work line;
said trucks having stop means for forming, along said work line and downstream from the push module, a train of trucks contacting one another between said rails, the train of trucks being pushed along at a predetermined speed by the powered belt of the push module only.

The combination of the features of claim 1 is not suggested by any of the documents cited in the search report.

Claim 1 is therefore new and inventive within the meaning of Article 33(2) and (3) PCT.

- 1.2 Claims 2-13 are dependent on claim 1 and as such also meet the requirements of the PCT with respect to novelty and inventive step.
